Rigging a Gaastra High Performance Camber Sail

- GTXrace
- Vapor

Get your sail, mast, boom and base ...

... insert the mast! Do NOT mind about the cambers now!!!

Attention:
Do NOT put the mast through the cambers at this step!
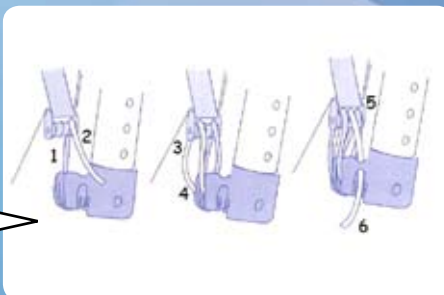

Put the mast all way up ...

... check to see male head plug is in the female mast plug!!!

Check the sail specs and set up your base accordingly!

Thread your rope correctly!

Pull downhaul to about 35% tension!

Connect the boom in suitable position and lock it!

Set boom to length and pull outhaul rope to tension sail 100%

Attach the camber to the mast. Reach through zipper ports to add curve inside the sock to pop cambers on!

Start with the top camber ...

... reaching in through boom opening ...

... go down ...

... and finish with the bottom camber!

Set the luff to 100% too! Thats it, have fun!
